

## A PCOS Society Initiative

- ‘Vijayeta -the Winner’ is an outreach program of the PCOS Society of India which is being supported by Philips. The project has been conceived to educate women, regardless of whether or not they have been diagnosed with PCOS. The awareness sessions are held both virtually and physically in various organizations, universities, corporates reaching out to girls and women of all ages.
- Diagnosing PCOS at a young age can definitely prevent morbidities in later life such as Diabetes, Hypertension, Cardiovascular disease, Obesity etc.
- Hence our objective to create this program is to make girls and women aware of this complicated disorder which cannot currently be treated but can definitely be kept under control, if diagnosed early.
